

City of Fountain Valley

Construction and Demolition Waste Management Plan

To comply with State and City recycling requirements, a Waste Management Plan is required for residential demolition and construction projects that increase the footprint of a home and all commercial and industrial demolition and construction projects. All qualifying projects must recycle 65% of the waste that is generated.

A Waste Management Plan must be completed and approved before any Building permits will be issued.

Trash Disposal Information

Republic Services is the City's franchised waste hauler. Use of any other company's dumpsters are subject to impound, impound fees and disposal fees. Please indicate how trash will be disposed: <input type="checkbox"/> Republic Services. Provide invoices for trash service. <input type="checkbox"/> Self Haul to dump. All self hauling will require a dump ticket certification showing 65% of the waste is being recycled. Failure to show these documents will prevent issuance of permits and construction inspections.
--

You are required to keep all dump tickets and receipts. Demolition projects will not receive a construction permit unless documents are provided. During the framing and final inspection these documents will be collected and reviewed before your project is signed off.
